-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 10-6-2003 has been considered.

Drawings

3. The formal drawings are approved by the examiner.

Title

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a

Art Unit: 2852

national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawasumi et al. (6,529,703). The electrophotographic reproduction machine by Kawasumi et al. comprises a substrate registration system for transporting and registering the substrate and a toner image traveling at a transfer velocity, a method of controlling the velocity of a copy substrates comprising: decelerating the substrate from a process velocity to a low velocity, wherein the transfer velocity is greater than the low velocity and less than the process velocity; registering the substrate via the substrate registration system; and accelerating the substrate to the transfer velocity for image transfer (column 5, lines 27-36). The method further comprising transporting the substrate through the registration system via a first pair of simplex drive rollers, a second pair of simplex drive rollers, and a pair of pre-registration drive rollers (Figure 3).

7. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hozumi et al. (6,014,542). The electrophotographic reproduction machine by Hozumi et al. has a substrate registration system for transporting and registering the substrate and a toner image traveling at a transfer velocity, a method of controlling the velocity of a copy substrates comprising

Art Unit: 2852

decelerating the substrate from a process velocity to a low velocity, wherein the transfer velocity is greater than the low velocity and less than the process velocity; registering the substrate via the substrate registration system; and accelerating the substrate to the transfer velocity for image transfer (column 5, lines 39-67). The method further comprising transporting the substrate through the registration system via a first pair of simplex drive rollers, a second pair of simplex drive rollers, and a pair of pre-registration drive rollers (Figure 1).

Prior Art of Record

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujita (6,771,928) teaches pertinent prior art.

Allowable Subject Matter

9. Claims 2-4 and 6-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Contact Information

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on weekdays between the hours of 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on 571-272-2136. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306.
